

## Manufacturing Routing Management

### Manufacturing Productivity Solution

- Improved Routing Control
- Reduced Process Time
- Reduced Process Errors

#### Problem Description

A nationwide supplier of manufacturing services wanted to implement a barcode scanning system to improve the routing process control capability of its legacy job tracking system.

#### AIM Solution

AIM seamlessly integrated a barcode scanning and tracking system into the legacy job tracking system. Barcodes were added to routing documents which machine operators scanned as the manufactured product was routed to each machine station in the process.

#### Benefits

Barcoding significantly improved routing times and accuracy by reducing operator documentation time and errors.

#### Why choose AIM?

Choose AIM to guarantee a quality project managed by a hands-on project manager, engineer, MBA, with Six Sigma quality credentials and decades of experience not only designing and implementing productivity and management solutions, but using them as a “real-world” professional manager.

Choose AIM to ensure your project does not go over budget. AIM can offer fixed or ROI-based pricing. Over many years and dozens of projects, AIM has never exceeded a fixed priced budget – and never will.

Choose AIM to reduce delays and missed deadlines. AIM eliminates needless layers of management and communication obstacles inherent to traditional project teams.

Choose AIM because you want a partner with both a winning attitude and record that brings a competitive advantage to your team.
